

PDM CLOUD HOSTING

Leverage the power of SOLIDWORKS PDM Professional or Standard with enterprise-grade cloud infrastructure. GoEngineer's PDM Cloud Hosting delivers secure, scalable, and expertly managed data management solutions powered by Microsoft Azure.

ENTERPRISE-GRADE INFRASTRUCTURE

- **Azure-Powered Hosting**
SOLIDWORKS PDM Professional or Standard environment hosted on high-performance virtual hardware exceeding all manufacturer system requirements, powered by Microsoft Azure
- **SQL Server Licensing**
SQL Server Standard licensing included for PDM Professional deployments (PDM Standard uses SQL Express database)
- **Scalable Storage**
256 GB of dedicated archive storage included with flexible scalability options for growing data needs

RELIABILITY & PERFORMANCE

- **Automated Backups**
Automated daily backups with 30-day retention ensure your critical design data is always protected
- **24/7 Monitoring**
Proactive 24/7 monitoring of system availability and storage capacity
- **Global Infrastructure**
Global network with 12 datacenters across North America and 160+ worldwide locations, delivering high-speed connectivity through Microsoft Azure's enterprise backbone

EXPERT MANAGEMENT & SUPPORT

- **Annual Upgrades**
Two complimentary PDM server upgrades per year, professionally executed by GoEngineer's certified SOLIDWORKS PDM experts
- **Performance Management**
Ongoing performance optimization and maintenance handled by our experienced technical team

SECURITY & ACCESS

- **Secure Network Connectivity**
IPsec site-to-site VPN tunnels for seamless office integration and point-to-site VPN connections for remote workforce access
- **Enterprise Security**
Protected by Azure Network Security Groups with strict firewall rules, ensuring only authorized traffic reaches your PDM environment
- **Complete Tenant Isolation**
Your infrastructure operates in a dedicated Azure subscription, completely isolated from other customers
- **Data Protection**
Industry-standard encryption for data in transit and compliance with enterprise security best practices
