

3DEXPERIENCE SIMULIA INDUSTRIAL EQUIPMENT SIMULATION

A Virtual Event

Join GoEngineer for a webinar for 3DEXPERIENCE SIMULIA, the analysis solution powered by ABAQUS technology. In this webinar, we will showcase a few examples where the analysis tools in SIMULIA have aided engineers in the industrial equipment industry in making innovative designs and validating them.

With this powerful simulation program, Dassault Systèmes delivers a simple and integrated workflow for SOLIDWORKS users to expand their existing simulation with a more advanced and scalable solution.

Discussion will include

- Application of SIMULIA to Industrial Equipment Design
- 3DEXPERIENCE SIMULIA case studies for Structural Analysis (FEA) and Fluid Dynamics (CFD)
- Advanced materials, meshers and contact analysis options

FRIDAY, MAR. 4, 2022
12.00 PM PT
