

Somos® Taurus™

Stereolithography

A robust material with an unparalleled combination of thermal and mechanical performance.

Somos® Taurus brings the combination of thermal and mechanical performance that previously was not possible with stereolithography materials. Its robustness combined with a charcoal gray appearance makes it ideal for the most demanding functional prototyping and end-use applications. Parts printed with this material are easy to clean and finish. The higher heat deflection temperature of Somos® Taurus increases the number of applications for the part producer and user.
